

URBAN SOLUTIONS REAL IMPACT

3-5 NOVEMBER 2026
BARCELONA

For the first time in human history, the tools to reimagine our cities are in our hands. **The question is no longer what's possible, but how we make it real.** How we address our shared challenges. How we deliver outcomes that impact directly on residents' quality of life.

The solutions already exist. They're already thriving in local city projects, community initiatives, and cutting-edge research centers — driven by leaders, urban planners, and engineers who dare to think boldly. What's missing is not ideas. **It's the bridge between ambition and impact.**

That bridge is what we build here.

Every November, thousands of city changers from around the world gather at **Smart City Expo World Congress** to bring these existing solutions to light, exchange knowledge, and shape the future today — building meaningful connections, sparking collaboration, and experiencing innovation first-hand.

Because the future of our cities isn't something we wait for. **It's something we forge together.**

And in 2026, we go further.

Join us in Barcelona. **Let's turn urban solutions into real impact.**
